

# The Power of Light

• LED • NO COST • WORRY FREE PROGRAM

## Our Power of Light Program

Facility Solutions Group (FSG) is offering a unique program for customers to upgrade their lighting systems at no out-of-pocket cost. With our Power of Light program you can update your property with the newest technology, enjoy better lighting, and lower utility bills with no out-of-pocket investment or risk.

## How Does it Work?

FSG maintains ownership and warranty coordination responsibility of the lighting system for the term of the agreement. Since FSG owns the system, you eliminate any worries or concerns about technology risk or obsolescence. During the term of the service agreement, FSG will provide 100% of all required replacements for LED's and drivers. Warranty labor can also be included for an additional cost.

## The Process

- FSG will perform a complete energy survey of your property and then create a complete lighting design.
- We will then install sample fixtures to measure and confirm lighting levels.
- Once you approve each measure, fixtures will be ordered and installed.
- After the system is fully installed and operating, you will make your first payment.

## Service & Maintenance

Over the life of the agreement, FSG will coordinate the warranty of installed fixtures. If there is a failure of a fixture or fixture component FSG will replace the fixture or component. All installed fixtures are covered for the entire length of the service agreement from the day it is installed until the expiration date.

## Technology

FSG uses Energy Star® and DLC certified products from major manufacturers that we can stand by. With advancements in LED lighting technology, customers will see energy savings on average of over 65% with a longer life and higher lumen output than existing lighting technology. These products also reduce carbon emission and, with our service agreement, virtually eliminate lighting maintenance costs.

## About FSG

Facility Solutions Group, (FSG) is one of the nation's largest single-source providers of lighting and electrical products, electrical services, electrical construction, and energy management solutions. With a successful 34 year history of serving customers, FSG develops, designs, markets, sells, and supports all types of lighting, electrical, control, and energy-saving products and services.

The company's products and services enable customers to build, maintain, expand, or upgrade their facility infrastructures, in scenarios ranging from new construction to remodels to ongoing operations.
